

Ramadhan Akmalludin

IoT Engineer | IT Helpdesk

ramadhanakmalludin@gmail.com | +62 857-7328-7284 | github.com/rmdhn712

Jati VIII No.1A RT08/09, Jakarta

PROFESSIONAL SUMMARY

IoT Engineer & IT Helpdesk with 1.5 years of experience assembling, programming, configuring, and integrating IoT devices for environmental monitoring in real estate settings. Proven track record implementing real-time monitoring systems, including 27 elevator temperature sensors, sump pit monitoring across 6 critical points, and rooftop/ground water tank monitoring. Proficient in C++, Python, ESP32, MQTT, Wi-Fi, LoRa, and APIs, backed by strong troubleshooting and IT system maintenance skills.

WORK EXPERIENCE

IoT Engineer & IT Helpdesk

IoT System Integration & Development | Last 1.5 years

- Assembled, programmed, configured, and integrated IoT devices for environmental monitoring in real estate applications.
- Developed real-time monitoring systems using ESP32, MQTT, Wi-Fi, LoRa, and APIs.
- Integrated 27 temperature sensors for elevator monitoring, sump pit monitoring across 6 critical points for wastewater containment, and rooftop/ground water tank monitoring.
- Monitored system health and produced periodic operational status reports for IoT devices.

Tech: ESP32, MQTT, LoRa, C++, Python, API, JavaScript

IoT Engineer & IT Helpdesk

IT Infrastructure & Technical Support | Last 1.5 years

- Configured IP addresses and established local network setups; installed and configured LAN networks for optimal connectivity.
- Executed hardware and software troubleshooting responsively.
- Performed monitoring using Grafana.
- Performed quality checks on console devices, from hardware to applications.
- Guided tenants on using the company's console and apps, and assisted with IT-related issues.
- Collaborated with developers on app-related issues.

Tech: Networking, LAN, IP Configuration, Troubleshooting

KEY PROJECTS

- Elevator Temperature Monitoring System** – 27 temperature sensors monitored in real time.
- Sump Pit Monitoring System** – 6 critical points for wastewater containment.
- Rooftop & Ground Water Tank Monitoring System** – water level monitoring across tanks.
- IoT Monitoring Dashboard** – integrated into the system, deployed, and verified to operate as intended.

SKILLS

IoT & Embedded	ESP32 / ESP-IDF, Arduino IDE, C++, Python, JavaScript, MQTT, LoRa, APIs
IT & Networking	Networking & IP Configuration, LAN Setup, Hardware & Software Troubleshooting, Grafana
Soft Skills	Problem Solving, Teamwork, Technical Reporting

EDUCATION

SMK Kencana 1 Jakarta | 2018 – 2021
