EDUCATION

SMK Kencana 1 Jakarta

2018 – 2021

SMPN 65 Jakarta

2015 – 2018

SDN Sungai Bambu 05 Pagi

2008 – 2015

RAMADHAN AKMALLUDIN

IOT ENGINEER | IT HELPDESK

PROFESSIONAL SUMMARY

IoT Engineer & IT Helpdesk with 1.5 years of experience in assembling, programming, configuring, and integrating IoT devices for environmental monitoring in real estate settings. Proven track record in implementing real-time monitoring systems, including 27 elevator temperature sensors, sump pit monitoring across 6 critical points, and rooftop/ground water tank monitoring. Proficient in C++, Python, ESP32, MQTT, Wi-Fi, LoRa, and APIs, supported by strong troubleshooting and IT system maintenance capabilities.

WORK EXPERIENCE

IoT Engineer & IT Helpdesk

IoT System Integration & Development

- Assembled, programmed, configured, and integrated IoT devices for environmental monitoring in real estate applications.
- Developed real-time monitoring systems utilizing ESP32, MQTT, Wi-Fi, LoRa, and APIs.
- Successfully integrated 27 temperature sensors for elevator monitoring systems.
- Successfully integrated sump pit monitoring systems across 6 critical points for wastewater containment monitoring.
- Successfully integrated water tank monitoring systems for rooftop and ground areas.
- Monitored system health and generated periodic operational status reports for IoT devices.

IT Infrastructure & Technical Support

- Configured IP addresses and established local network setups.
- Installed and configured LAN networks to ensure optimal connectivity.
- Executed hardware and software troubleshooting responsively.
